EDUCATION

Sharda University — B.Tech in Computer Science

Aug 2023 – Present

Greater Noida, India | CGPA: 6.9 / 10.0

TECHNICAL SKILLS

Languages: Java (Core + OOP), Python, JavaScript, SQL

Backend / Web: REST APIs, Java Backend, Python Scripting, HTML, CSS

CS Fundamentals: DSA (Arrays, Linked Lists, Trees, Recursion, Sorting, DP), OOP, DBMS, OS, CN

ML / Data: Scikit-learn, Pandas, NumPy, Feature Engineering, Classification Models

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook, Linux CLI

PROJECTS

AI-Based UPI Fraud Detection System

Python · Scikit-learn · Pandas · NumPy

- Built an end-to-end ML pipeline to classify suspicious UPI transactions, targeting a fintech security problem affecting 300M+ active UPI users in India.
- Engineered features from raw transaction data (amount patterns, frequency signals, merchant categories); handled class imbalance using SMOTE oversampling.
- Trained Logistic Regression and Random Forest classifiers; achieved ~89% precision and ~85% recall on held-out test data, minimising false negatives.
- Designed a modular prediction pipeline enabling straightforward integration with real-time transaction monitoring systems.

Farmer Marketplace Platform

Java · Python · SQL · HTML · CSS · JavaScript

- Architected a full-stack marketplace connecting farmers directly with buyers, eliminating supply-chain middlemen and reducing transaction overhead.
- Designed a normalised SQL schema for product catalogue, order lifecycle, and user roles; implemented RESTful backend APIs for full CRUD and order flow.
- Built a responsive frontend with HTML/CSS/JS for product browsing and cart management, prioritising usability for low-tech rural users.

EXPERIENCE

DSA & Web Development Bootcamp — Sharda University

May 2025 – Jun 2025

- Practised 15+ core DSA topics (arrays, recursion, sorting, searching) through structured daily coding exercises; built 3 mini JavaScript web projects.
- Completed mock technical interview rounds and aptitude sessions to prepare for campus placement drives.

COMPETITIVE PROGRAMMING & CERTIFICATIONS

- LeetCode (PRAS9829): Solved 120+ problems covering Arrays, Strings, Linked Lists, Trees, Recursion, Sorting, and Dynamic Programming; Graphs in progress.
- SQL (Intermediate) — HackerRank: Joins, subqueries, aggregation, window functions, and data analysis. (Jan 2026)
- Java Programming — GeeksforGeeks: OOP, data structures, collections, and problem-solving patterns.
- CSS — HackerRank: Responsive layouts, flexbox, grid, and modern CSS techniques.
- GitHub (Prashanttp): 20+ contributions across personal and academic projects; actively maintaining repositories.
