

PRASHANT PANDEY

✉ prashantpandeyjava@gmail.com ☎ +91 9717405878  LinkedIn  Github  Portfolio

Profile

Computer Science undergraduate with a strong foundation in Java, Spring Boot, SQL, DBMS, and object-oriented programming. Experienced in building secure and scalable backend applications using Spring Boot, PostgreSQL, REST APIs, JWT authentication, and Docker. Passionate about backend development and eager to contribute as a Software Engineer.

Technical Skills

- Languages:** Java, SQL, C++
Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, JWT
Database: PostgreSQL, MySQL
Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code
Platforms: Docker, AWS (Basics), Render
Core CS: OOP, DBMS, Data Structures, Algorithms

Professional Experience

Indibus Technologies Pvt. Ltd.
Software Engineering Intern

- Engineered backend features using Java and Spring Boot in production environments.
- Designed and validated REST APIs through collaboration with senior engineering teams.
- Leveraged PostgreSQL, Spring Data JPA, and Git to streamline backend development and testing workflows.
- Resolved application issues through systematic debugging and peer code reviews to enhance system reliability.
- Executed tasks within an Agile development framework to support cross-functional team objectives.

Apr 2026 – Jun 2026

Projects

CareerHub

- Architected production-ready CareerHub backend using Java 21, Spring Boot 3, and Spring Security.
- Implemented JWT authentication and role-based access control for multi-user personas.
- Developed scalable REST APIs using layered architecture, DTOs, and Flyway for database versioning.
- Integrated OpenAPI/Swagger documentation and containerized services for deployment via Docker.
- Standardized API responses through global exception handling and request validation strategies.

[Github Repo](#) | [*Spring Boot 3, Spring Security, Flyway, Docker, Swagger, Maven, Git, Github, Postman, Lombok, PostgreSQL*]

Hospital-management-system

- Built modular Hospital Management System backend integrating Java, Spring Boot, and PostgreSQL.
- Modeled relational database entities for clinical entities including patients, doctors, and appointments.
- Developed secure REST APIs and verified data integrity through systematic Postman testing.
- Implemented robust architecture utilizing DTOs, global validation, and role-based authentication.
- Optimized persistence layers and query performance using Spring Data JPA.

Jul 2026
May 2026

Achievements

- LeetCode (PRAS9829):** Solved 150+ problems across Arrays, Strings, Linked Lists, Trees, Recursion, Sorting, and Dynamic Programming [LeetCode](#)
- SQL:** SQL (Intermediate) — HackerRank: Joins, subqueries, aggregation, window functions, and data analysis. (Jan 2026)
- Java Programming:** GeeksforGeeks: OOP, data structures, collections, and problem-solving patterns.
- GitHub (Prashanttp):** 20+ contributions across personal and academic projects; actively maintaining repositories. [GitHub](#)

Certifications

- CS50: Introduction to Computer Science:** Completed Harvard University's CS50: Introduction to Computer Science, building a strong foundation in programming, algorithms, data structures, databases, and problem-solving.

Education

Sharda University
B.tech (CGPA: 7)

Aug 2023 – Present
Greater Noida, India
